Enclosed Head, Lounge and
Electric Head, A/C and Generator
Optional

[Limitless Options]

The MTI-V 57 was designed and built to have the ultimate riding experience with the most options of a high performance boat in a V-bottom model. The MTI-V 57's performance is incredible for its size as it runs 70 mph with Quad Mercury Verado 400R and over 80mph with Quad Seven Marine engines. With an 11-foot beam and just at 21,000 lbs the MTI-V 57 is the best handling V-bottom on the market. So many features appear to be custom on each individual model, but are available in each boat and come to our customers as standard features.
