Per Sanctioning Body

## [Limitless Options]

The popular 340X platform is now available in a race focused model for Outboard powered competition. Our ability to custom build the boat to specific class requirements enables us to build a class specific boat to take you to the winners circle. Photos shown are of an X Cat compliant boat with a 32' overall length. The canopy has been designed with impact windows and integrated roll-bars for the best possible protection for the crew. As with our larger race boats, we offer services from a simple hull and deck, to complete race boats with trailers, trucks and support trailers. Proven management and testing / training is also available.
