The 39' outboard catamaran, kindly known as the 390X was modeled after our popular 340X cat. The 390X was crafted using completely new CNC molds with integrated steps up the back. As the 390X is 5 feet longer and 6 inches wider than its counterpart, you can expect a better ride in bigger ocean waters. As the 390X joins the MTI lineup, it is impressing the powerboating community.
